

# Technology and Domestic Violence

## Australian survivors' experiences

### Tech abuse increases at separation

100% of survivors abused by an intimate partner reported tech abuse began or escalated at separation.

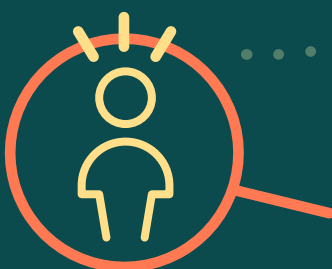

### Common types of abuse

Repetitive texting, emailing, GPS, cloud and Facebook monitoring were the most common types of abuse.

### Post-separation parenting

13 of 14 survivors with children reported technology-facilitated abuse during post-separation parenting.

### Impact

Technology magnifies the harms of domestic violence and created new forms of abuse.
